

**KONIVER** WELLNESS  
PROTOCOLS FOR PERFORMANCE

## FastVitaminIV<sup>®</sup>

*PUSH to Your Potential*

FastVitaminIV<sup>®</sup> helps you maximize your potential, using an innovative and proprietary blend of 19 vitamins, minerals, and amino acids. You will feel more energy along with a better mood, increased fat burning, and memory/brain support. The “PUSH Effect” is the name given to the feeling after receiving FastVitaminIV<sup>®</sup>. Some feel a surge of energy, others an immediate sensation of general happiness, and others a boost in mental clarity and focus.

### BENEFITS:

#### HYDRATION:

Simple hydration on the cellular level. This can correct dizziness, headaches, nausea, general fatigue, hangovers.

#### HEAL:

The blend of the 19 minerals in each FastVitamin<sup>®</sup> will help accelerate the healing process that your body is already undergoing.

#### PERFORMANCE AND RECOVERY:

Preparation, optimal performance, and faster recovery will be achieved with our blend. Get these key components that will optimize your fitness levels and set you on the right track for success. Give your body the fuel it needs for peak performance!

#### HANGOVER AND MIGRAINE CURE:

Relieve your pain in seconds! Our blend will ease and hydrate, leaving your head feeling better in minutes. Never battle through those rough mornings again.

### FAT BURN:

Slim down with our fat burning blend of amino-acids. This blend helps metabolize fat and toxins from the liver. Remove harmful waste while boosting all in one!

### ANTI-AGING:

As we age gracefully, we are more susceptible to the risk of dehydration. Take control of the aging process by providing your body with the correct nutrients it needs to maintain balanced fluids and vitamins. Age gracefully into your golden years!

## THE SCIENCE

FastVitaminIV® is specifically designed by Dr. Koniver to scientifically outclass traditional IV drips offered by old school IV services that take 30-120 minutes to deliver their diluted mixtures.

By pushing the FastVitaminIV® blend in 60 seconds or less, your body quickly gets what it needs. You may feel what people describe as an “amazing” rush as every cell in your body sucks in the bounty of undiluted vitamins, minerals and amino acids.

Each FastVitaminIV® contains 19 nutrients including:

- Full range of B-vitamins (B1, B2, B3, B5, B6, B12 (Methylated))
- Magnesium
- Comprehensive blend of amino acids:
  - Isoleucine
  - Leucine
  - Lysine
  - Methionine
  - Phenylalanine
  - Threonine
  - Tryptophan
  - Valine
  - Alanine
  - Arginine
  - L-Aspartic Acid
  - L-Glutamic Acid
  - Glycine
  - Histidine
  - Proline
  - Serine
  - N-Acetyl-L-Tyrosine

## WHAT TO EXPECT

- Each FastVitaminIV® is administered over 30-60 seconds intravenously. Despite being a very small quantity of liquid, this solution is still considered IV since it goes directly into the vein.
- Every time a client receives a FastVitaminIV® push, they will experience the following:
  - Start to taste the solution first. (taste like a B vitamin)
  - Feel warmth in the back of their throat after about 15 seconds.
  - That warmth will travel down their body and they will feel as if they have to urinate. (don't worry, no one ever has!)
  - They will continue to get very warm all over. Many Times people remark their feet and hands feel very warm.
  - This heat may cause some blurry vision and lightheadedness.
  - And then, just as quickly as those previous feelings came on, (1 minute), they are GONE!
- We have NEVER EVER had an adverse reaction from FastVitaminIV®
  - It generally starts to "kick in" after about an hour and clients generally notice 3-7days of:
    - Better visual acuity
    - Improved mood
    - Boost in exercise intensity
    - Expedited recovery from exercise
    - Much better sleep
    - Elevated concentration and focus
    - Overall sense of well-being
- Due to the majority of adults having multiple nutrient deficiencies, it generally takes 4-5 FastVitaminIV® pushes before the benefits really kick in.

Because each FastVitaminIV® only takes a few minutes to administer, most people

- receive one 1-2x/week.
